

D.Lgs n. 116 of 2020 in force since September 26, 2020 - amends D.Lgs n.152/2006 implementing the directive (EU) 2018/851 on waste and the directive (EU) 2018/852 on packaging and packaging waste.

This decree introduced an important change to the Environmental Code such as the obligation of environmental labelling for materials. The content of the information to be affixed on the label in terms of environmental labelling provides for a distinction linked to the intended use of the product itself; for packaging material intended for the B2B channel (therefore not for the final consumer), the legislation provides for the obligation to affix only an alphanumeric code identifying the material in compliance with Commission Decision 129/97/EC of 28 January 1997 establishing a system identification for packaging materials under Directive 94/62/EC of the European Parliament and of the Council on packaging and packaging waste, leaving a voluntary approach towards additional information on collection and disposal.

The complete list of packaging used for the products supplied by Trafilerie Carlo Gnutti SpA are shown in the table below:

PACKAGING	MATERIAL	CODE
Cases, pallets, sticks	Wood	FOR50
Straps, Crimps joint, coil rings	Steel	FE40
Coil Straps	Plastics	PET 1
Filament tape for Labels and small bundles	Plastics	LDPE 4
Film and Pluriball	Plastics	LDPE 4
Corrugated paper	Paper	PAP 20
Paper for small bundles	Paper	PAP 22
Protective paper for coils	Paper	PAP 21
Labels	Paper	PAP 21
Anticorrosive paper inside cases	Composites	C/HDPE 81
Depressurized bags for strips in cases	Composites	C/LDPE 90
